Views Controlled Vocabularies (VCV) Task Group
Google Hangout meeting
2019-12-12 15:00 UTC

Attending: Steve Baskauf, Matthew Nielsen, Martin Stein, Randy Singer, Neil Cobb

Meeting notes:

1. Steve reviewed the use cases that we've received so far.
    A. There were few and he still hoped to get ones from Niels Klazenga and Bruch Kirchoff before the first of the year.
    B. Steve will try to turn emails from Ken-Ichi Ueda (iNaturalist) and Tim Robertson (GBIF) into the use case form, then verify that they are OK with calling them submissions.

2. Steve will write a draft Feature Report as a Google doc and share it with the group.

3. We will schedule a meeting in January to start hammering out the report.
